Strength and weakness

Name: MUHAMMAD AQEEF BIN AZHAR

1. Technical / Software Skills

Strengths	Areas for Growth
• Cloud computing fundamentals • Mobile app development with Flutter, integrating Firebase Authentication, Realtime Database, and REST/Maps APIs • Linux system administration (Kali, Ubuntu) service configuration and troubleshooting • Basic HTML, CSS, Java Script • Good in C++ and C • OOP fundamentals • Experience in Microsoft Access • Experience using SIEM (Kibana)	• Still building depth in backend/server-side development (currently learning Node.js) • Limited exposure to production-scale deployment and DevOps pipelines • Would benefit from more hands-on experience

2. Networking

Strengths	Areas for Growth
• network administration fundamentals and system services • IoT protocol knowledge from Cisco Introduction to IoT	• Mostly lab/academic exposure so far limited real enterprise network experience • Could deepen knowledge of advanced routing/switching and network security tools

3. Project Management

Strengths	Areas for Growth
• Currently doing my Final year project (Secure Cloud Storage with Random Forest Model and AES encryption.	• Limited experience with formal project management tools/methodologies (e.g., Agile/Scrum in a real team setting) • Time estimation on larger projects can still be improved

4. Communication

Strengths	Areas for Growth
• Learned 3 language (Bahasa Melayu, Engglish and French) • Presented at an international level (SULAM 2026 webinar multimedia & publicity role, on camera talent) • Experience coordinating with peers as former Club President	

5. Leadership & Soft Skills

Strengths	Areas for Growth
• Leadership experience as President of the Netcentric Computing Club • Self directed learner picks up new tech stacks independently • Entrepreneurial exposure through coursework and freelance exploration	• Delegation and team management still developing beyond a club setting • First major exposure to real industry/workplace culture will be through this internship
