CLOUDIE: SECURE CLOUD STO MALWARE ANALYZER & ENCRYPTION

MUHAMMAD AQEEF BIN AZHAR | DR. FAKARIAH HANI BINTI MOHD

INTRODUCTION

Cloud storage security is critical as organizations move their operations online. Cloudie protects data by **inspecting every uploaded file for malware before it is stored**, then encrypting it — combining AI-driven threat detection with strong cryptography in one platform.

PROBLEM STA

File-based malware is still a major threat in the cloud.

01

OUR SOLUTION

MALWARE ANALYZER

- Integrated with VirusTotal & a Random Forest AI model
- Analysis with multiple antivirus engines
- Blocks suspicious files before storage

AES ENCRYPTION

- Uses AES-256 (Advanced Encryption Standard)
- Unique key for each encrypted file
- Prevents unauthorized access even if breached

QR CODE KEY

- File access granted via a unique QR code
- No public URLs or manual sharing
- Acts like a digital key — private & secure

SOCIAL & ECO

01

Double-Layered Sec

Combines preventive det and protective encryptio

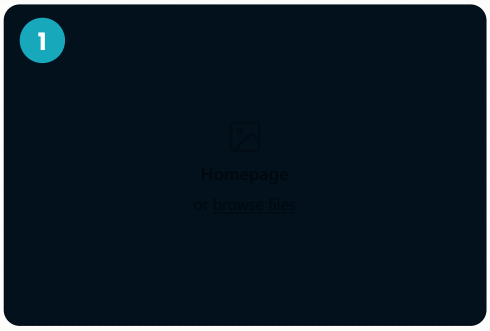

03

Social Impact

Aligns with UN SDG 9 (In Innovation) and SDG 16 (Institutions).

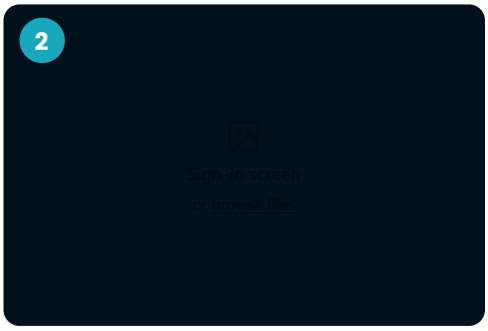

INVENTION APPLICABILITY
